

Product Description:

Birdzout auto laser units are a highly effective way of deterring birds from large areas. These are setup to automatically cover an area from a central point or one side of an area. These lasers pan and tilt over an area which is set as required. Saving time, money and labour, a cost effective bird deterrent system.

Specifications:

- Model Number: BZAL-500
- Laser class: 3B
- Laser output power: 499mw
- Laser wavelength: 532nm
- Rotation: 350°
- Tilt: 20° downward, 90° upward
- IP Rating: IP65
- Operating Temperature: -15°C to 40°C
- Preset positions: 80
- Modes: Sequence & Random
- Laser coverage distance in sunlight: up to 250m*
- Area covered: up to 15 hectares in daylight*
- Package includes: Birdzout auto laser unit, controller with keypad and joystick, emergency stop switch, power supplies for mains and 12v connections.
- Warranty: 12 months against manufacturer defect
- Expected lifespan: 10,000 hours
- Unit Size: 140 x 140 x 250mm, 3kg
- Packaged Weight: 5kg
- Packaged Dimensions: 430 x 260 x 430mm

Recommended Use:

Use to deter most birds species from a variety of areas including: crops, vineyards, orchards, pond areas, building rooftops, upper perch areas of warehouses and other large buildings. Not recommended for use in the direct vicinity of people, particularly in areas of unrestricted access.

*Laser coverage is a guide only and can vary by application and bird species.
